STF5	13kg	18kg	360×260×295	4GV/4G
STF6	19kg	27kg	430×310×300	4GV/4G
STF6A	12kg	–	420×240×440	4GV
STF7	29kg	34kg	390×390×425	4GV/4G
STF7A	19kg	–	420×420×440	4GV
STF8	42kg	50kg	575×370×420	4GV/4G
STF8A	45kg	–	600×600×440	4GV
STF9	80kg	91kg	775×575×540	4GV/4G

\*Packing Group 1 max weights

Safe Paks 1 to 8 hold the 4GV and 4G licences.

Safe Paks 2A, 6A, 7A and 8A hold just the 4GV licence.

It is the shipper's responsibility to select and use the case correctly but if in doubt please consult the Safe Pak manual on line at [www.safetpak.co.uk](http://www.safetpak.co.uk) or contact Tri-Wall at the addresses below.

## 4GV and 4G ratings

Most products that are classed as dangerous/hazardous and have a UN identification number allocated to them are required to be packed in certified packaging. The Tri-Wall range of UN certified packs are both 4GV and 4G rated.

4GV rated packs have been over-tested to accommodate any inner packaging or article. When packing under the 4GV licence any inner packaging can be used as long as Modal regulations are followed. Under the 4G licence the inners must be of a specified design.

The requirements stem from the UN Recommendations on the Transport of Dangerous Goods. These form the basis of the regulations for the four modes of transport listed...

**AIR:** IATA DANGEROUS GOODS REGS  
ICAO TECHNICAL INSTRUCTIONS

**SEA:** IMDG CODE

**ROAD:** A D R (International Only)  
CDGCPL II (UK Roads)

**RAIL:** R I D
